Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

A MONTHLY BIBLIOGRAPHY OF ANTHROPOLOGIC LITERATURE

COMPILED BY ROBERT FLETCHER, M. D.

Fossil Footprint.—It is reported that H. E. Huford, of Kemper Lane, Walnut Hills, Cincinnati, exhibited before a recent meeting of the Ohio State Academy of Science, a large stone taken from the hillsides four miles north of Parkersburg, on the West Virginia side of Ohio river, about twenty years ago, in which there was the imprint of a perfect human foot, 14½ inches in length. The matter will be investigated by the Society.

Special Papers.—Members of the Anthropological Society and subscribers to the *Anthropologist* who have not received the Special Papers—"Status of the Mind Problem," by Lester F. Ward, and "The Earth, the Home of Man," by W J McGee—will be furnished a copy of each on application to the Curator, 1333 F street, Washington, D. C.
